

## **Our services:**

1. Create a dedicated token -
  - A. Basic contract
  - B. Medium contract
  - C. Advanced contract
  - D. Custom contract - Custom pricing based on the client's unique requirements

2. Create a landing page website explaining about token, company, team members, etc

Type A - Template

Type B - Custom Designed

3. Tokenomics Analysis and Planning for the project
  4. Setup ICO or crowdsale - Automatic Smart contract based
  5. List your token on coinmarketcap, coingecko - We do audit and assistance service for this to make sure of proper approval
  6. Listing your token on etherscan/bscscan
  7. List your coin on a DEX exchange like uniswap or pancakeswap etc - This is an assistance service
  8. Token contract Auditing
  9. Token Wallet app development - Android and IOS app for transferring crypto by scanning QR code
  10. Listing on tier 3 centralized exchange - Payment goes to the exchange directly
- 1-10 will be the basic steps. 11 will be the actual project development like exchanges, nft platforms, dedicated project development, etc. You will need to do this for people to believe in your project. Cost and timeline for development will be separate from this based on your requirement.
- 12 - Hiring a dedicated Blockchain Consultant/Overall Project Manager for your project - Monthly Payroll - (Subject to the availability of the resources)
-
